

FOR IMMEDIATE RELEASE

Omnalink Expands Executive Team with Addition of Suzanne Henderson as Vice President of Engineering

Atlanta — December 17, 2009 — Omnilink Systems (www.omnilink.com), a market leader in location solutions that help ensure the safety and security of people and valuable assets, as well as the recovery of any that go missing, recently expanded its executive team with the addition of Suzanne Henderson as vice president of engineering. Henderson is responsible for overseeing all application development initiatives at Omnilink as the company focuses on launching new personal tracking applications and building unique location solutions for all types of enterprises. She is based in the company's Atlanta office and reports to Omnilink's CEO, Wain Kellum.

"Suzanne brings more than 20 years of experience in development and has commercialized a wide range of software applications," says Kellum. "As we continue to grow our revenue and add a significant number of resources to our engineering team, Suzanne is an ideal addition to our company leadership.

Most recently, Henderson served as vice president of engineering for TerraGo Technologies, where she was responsible for product management, development and support. Prior to joining TerraGo, she led the engineering team for GuardedNet, a venture-backed organization that was ultimately acquired by IBM. She has also served as vice president of engineering for Clarus Corporation and has held a variety of technical and management positions with technology leaders including TSW International, Dun & Bradstreet Software and Management Science America (MSA).

Henderson holds a Bachelor of Science in computer science from Indiana University of Pennsylvania.

About Omnilink Systems

Omnalink Systems offers the most accurate and reliable platform for powering location aware mobile devices and applications. Utilizing its market-leading software, FocalPoint™, Omnilink provides complete on demand applications to rapidly provision and manage location intelligence for people and assets. Working with carriers, Fortune 100 companies, and U.S. Government Agencies through a software-as-a-service model (SaaS), Omnilink has built a complete LBS
